Washington DC

CHRIST IN MAJESTY

One of the largest mosaics of a single subject in the world, the 3,610 square foot mosaic covers the entire curved wall of the north apse. Designed by artist John de Rosen, made by the Ravenna Mosaic Company of St. Louis, Mo., the mosaic is made up of thousands and thousands of tiny pieces of glass. In it are almost 4000 shades of color, including 200 shades of gold, 300 shades of red.

Dear Mother Paul,

May He bless you during the year to come!

I hope you're in good health in spite of cold wintry weather.

I'm spending several days working conference in Washington.

ADDRESS

Sunday, my Sister took me to the Shrine for mass — it was a thrilling experience I'd like to share with you — the mosaics are out of this world — this doesn't do justice but gives an idea of them.

Let me know if I can do anything for you

In His love! Jan
